

Covid19

March 2020 a virus called covid19 hit the nation. It became a pandemic through the world.

Corona virus as it is also known is an illness that affects your lungs and breathing. You get a high temperature, continuous cough and difficulty in breathing. You must stay at home and not meet with other people.

We had to stay at home.
We couldn't visit our family
and friends.

We painted rainbow pictures to help us see the colours and brighten up our windows. Children enjoyed looking for rainbows on their walks.

Playgroups, cafes, libraries and soft play were shut. We missed going to groups to interact and see our friends.

We were allowed to go out only to the shops for shopping. Self-distancing of 2 metres was put into place so people were not close to each other and limits to how many people in the shops.

The NHS helped to make people better. They worked very hard and we clapped our hands for them every Thursday at 8ck to show our appreciation.

We could go out for a walk or a bike ride but play grounds *were shut*

Only children classed as key working children were allowed to go to school or to child minding settings. Key workers were classed as virtual and essential workers.

We made cakes
Drew pictures
Played with the Duplo
Dances to music
Sang lots of songs.

At Allison's house I played in the garden on the bikes and in the play house.
